Wikipedia Background

No matching Wikipedia page was retrieved for the exact query 'barstoolsports'.

Verification & Evidence

DIRECTLY OBSERVED

- X handle: `@barstoolsports` (display name “Barstool Sports”)
- Followers: 6,974,010; Tweets: 211,974; Account created 2009-03-03.
- Bio: “Viva La Stool”; Location: “America”; Verified: False.
- Sample of 500 recent tweets analyzed.
- Mentions in those tweets: 184 public account mentions (e.g., `@wakeupbarstool` 37 times, `@stoolgambling` 22 times).
- Most active hour: 1:00 AM; most active day: Thursday.
- Hashtags used: DKPartner (9), ad (7), DKpartner (4), etc.
- Keywords: “game” (37), “wakeupbarstool” (37), “football” (24), etc.
- Languages detected: 474 English, 1 German, 1 Spanish, 14 non-linguistic, 7 Italian, 2 undetermined, 1 “qme”.

CROSS-SOURCE CONSISTENCY

- No Wikipedia page was found for the exact query “barstoolsports”; thus no cross-source confirmation of the account’s identity or history.
- All other data come solely from X; no additional public records or third-party sources were retrieved.

NOT INDEPENDENTLY VERIFIED

- Retrieval of the X profile does not prove that the account is operated by the real-world entity “Barstool Sports”.
- The absence of a Wikipedia entry means there is no independent biographical verification.
- No external sources (e.g., corporate websites, press releases) were accessed to corroborate the account’s ownership or authenticity.

DATA COLLECTION LIMITATIONS

- Only 500 tweets were sampled; the full 211,974-tweet history was not examined.
- The “following” count was not available.
- Language detection flagged 14 tweets as “zxx” (non-linguistic), which may affect keyword analysis.
- No bot-detection or account-age verification was performed.
- Timestamps were available only for the sampled tweets, limiting temporal analysis to that subset.

CONFIDENCE NOTES

- High confidence in the accuracy of the retrieved X profile fields (username, bio, follower count, etc.).
- Moderate confidence that the 500-tweet sample is representative of recent activity, but it does not cover the entire account history.
- Low confidence in asserting ownership or authenticity of the account, given the lack of independent verification.
- No overall confidence score is provided, per the guidelines.

Data Collection Limitations

- Analysis is based only on data successfully retrieved during this investigation.
- Tweet availability can be affected by X request limits and scraper account availability.
- The requested tweet count is configurable and the report identifies the actual retrieved sample.
- Mention analysis is not a complete social-network graph.
- The retrieved tweet sample does not represent the account's complete historical activity.
- A Wikipedia source and an X account do not independently prove common ownership.
