Executive Summary

Executive Summary A 500 tweet sample from the X handle @NASA was collected and analyzed. The account’s username, display name, bio, and content themes align with the U.S. federal agency National Aeronautics and Space Administration (NASA) as described on Wikipedia. However, no independent verification confirms that the X account is officially operated by NASA. The data reveal active Friday evening posting, frequent mentions of related space flight accounts, and a predominance of English language content focused on space exploration topics. --- 2. Subject Identification - X profile retrieval: Successful – username “NASA”, display name “NASA”, 92,377,083 followers, 74,364 tweets, created 2007-12-19. - Wikipedia source retrieval: Successful – summary of NASA’s mission, structure, and affiliations. - Relationship verification: Not independently verified; the X account lacks a verification badge and no authoritative source confirms ownership. --- 3. X Profile - Username: @NASA - Display name: NASA - Bio: “Making the seemingly impossible, possible. 🚀” - Location: Pale Blue Dot - Followers: 92,377,083 - Tweets: 74,364 - Verified: False - Profile URL: https://x.com/NASA - Following count: Not available in the supplied dataset. --- 4. Mention Analysis - Total tweets analyzed: 500 - Public mentions identified: 749 - Top mentioned accounts: 1. @Space_Station – 121 mentions 2. @NASA – 66 mentions 3. @NASAAAdmin – 47 mentions 4. @NASARoman – 41 mentions 5. @SpaceX – 36 mentions (additional accounts listed in the supplied data). - Interaction count: 749. --- 5. Temporal Activity - Most active hour: 18:00 (6 p.m.) - Most active day: Friday (102 tweets) - Hour distribution (sample): 18 h – 68 tweets; 17 h – 53; 16 h – 51; 15 h – 44; 14 h – 40; 21 h – 47; 20 h – 50; 19 h – 44; 22 h – 25; 23 h – 15; 12 h – 9; 13 h – 18; 11 h – 8; 10 h – 3; 9 h – 2; 8 h – 1; 6 h – 1; 3 h – 2; 2 h – 4; 1 h – 4; 0 h – 11. - Day distribution: Friday 102, Wednesday 99, Tuesday 96, Monday 73, Thursday 70, Sunday 31, Saturday 29. --- 6. Topics & Interests - Hashtags (top 10): SpaceApps (4), NASA (2), X59 (2), Quesst (2), Crew13 (1), FlightSpark (1), NationalAviationDay (1), moonjoy (1), MissionToPsyche (1), Artemis (1). - Keywords (top 20): nasa (245), space (169), artemis (136), mission (116), moon (106), crew (105), live (85), launch (79), earth (60), next (59), today (58), spacex (52), here (52), learn (51), exploration (50), roman (48), nasaadmin (47), astronauts (47), lunar (46), future (46). - Languages: 499 English, 1 undetermined. --- 7. Wikipedia Background NASA is an independent U.S. federal agency established in 1958, headquartered in Washington, D.C. It conducts the United States’ civil space program and aeronautics research, operating three mission directorates and ten field centers. Notable programs include Mercury, Gemini, Apollo, the Space Shuttle,

the International Space Station, and Artemis, among others. NASA collaborates with ESA, JAXA, CSA, Roscosmos, NOAA, USGS, and the U.S. Space Force. --- 8. Verification & Evidence - The X account's username and display name match the entity name "National Aeronautics and Space Administration." - The bio and content focus on space exploration align with NASA's mission. - No verification badge is present; the "verified" flag is False. - Wikipedia does not confirm ownership of the X handle. - Therefore, ownership of the X account by NASA cannot be independently verified based on the supplied data. --- 9. Data Collection Limitations - Sample limited to 500 tweets; may not represent full account activity. - Language coverage almost exclusively English; non-English activity is not captured. - Time-zone context for timestamps is missing; activity peaks may be misinterpreted. - Following count and other profile fields were not retrieved. - Rate limiting during collection is a technical limitation that may have constrained data volume. - Only publicly available data were used; private or deleted content is excluded.

Topics & Interests

500 tweets were analyzed for hashtags, keywords and languages.

Observed Hashtags

#SpaceApps (4) • #NASA (2) • #X59 (2) • #Quesst (2) • #Crew13 (1) • #FlightSpark (1) • #NationalAviationDay (1) • #moonjoy (1) • #MissionToPsyche (1) • #Artemis (1)

Observed Keywords

nasa (245) • space (169) • artemis (136) • mission (116) • moon (106) • crew (105) • live (85) • launch (79) • earth (60) • next (59) • today (58) • spacex (52) • here (52) • learn (51) • exploration (50)

Interpretation note: keyword and hashtag frequency describes content signals within the collected sample. It does not independently prove personal interests.

Wikipedia Background

Entity / Full Name: National Aeronautics and Space Administration (NASA)

Entity Type: Independent agency of the U.S. federal government

Description: Responsible for the United States' civil space program and research in aeronautics and space.

Country / Nationality: United States

Occupation / Role: Space agency conducting spaceflight programs, scientific research, and technology development.

Known For: Leading American spaceflight programs (Mercury, Gemini, Apollo, Space Shuttle, ISS, Artemis) and major missions such as Apollo 11, New Horizons, Perseverance rover, James Webb Space Telescope.

Relevant Affiliations: European Space Agency (ESA), Japan Aerospace Exploration Agency (JAXA), Canadian Space Agency (CSA), Roscosmos, National Oceanic and Atmospheric Administration (NOAA), United States Geological Survey (USGS), United States Space Force.

Relevant Identifying Facts: Headquartered in Washington, D.C.; organized into three mission directorates (Human Spaceflight, Research and Technology, Science); operates ten field centers; established 1958.

Source URL: <https://en.wikipedia.org/wiki/NASA>

Verification & Evidence

DIRECTLY OBSERVED

- X account: username = "NASA", display_name = "NASA", followers = 92,377,083, tweets = 74,364, verified = False, created = 2007-12-19.
- Profile bio: "Making the seemingly impossible, possible. 🚀"; location listed as "Pale Blue Dot".
- Sampled 500 tweets: 749 public mentions of other accounts, most active hour 18:00, most active day Friday.
- Hashtags: SpaceApps, NASA, X59, Quesst, Crew13, FlightSpark, NationalAviationDay, moonjoy, MissionToPsyche, Artemis.
- Keywords: "nasa", "space", "artemis", "mission", "moon", "crew", "live", "launch", etc.
- Languages: 499 English, 1 undetermined.
- Network mentions: top mentions include @Space_Station, @NASA, @NASAAdmin, @NASARoman, @SpaceX, etc.

CROSS-SOURCE CONSISTENCY

- X username and display name match the entity name "National Aeronautics and Space Administration" from Wikipedia.
- Both sources identify NASA as a U.S. federal agency responsible for civil space programs.
- The X bio's emphasis on space exploration aligns with the mission descriptions in Wikipedia.
- No contradictions found between the X profile data and the Wikipedia summary.

NOT INDEPENDENTLY VERIFIED

- The X account lacks a verification badge; "verified" flag is False.
- Wikipedia entries do not confirm ownership of the X account.
- No external, authoritative confirmation (e.g., NASA's official website linking to the X handle) is present in the provided data.
- Therefore, ownership of the X account by NASA cannot be independently verified.

DATA COLLECTION LIMITATIONS

- Only 500 tweets were sampled; may not represent the full activity or content of the account.
- Language data shows almost all tweets in English; non-English activity is not captured.
- Timestamps are provided but time zone context is missing; activity peaks may be misinterpreted.
- Following count and other profile fields were not retrieved.
- The analysis relies solely on publicly available data; private or deleted content is excluded.

CONFIDENCE NOTES

- Moderate confidence that the X account is associated with NASA based on consistent naming, bio, and content themes.
- Low confidence in asserting official ownership or endorsement due to lack of verification and independent confirmation.
- Any conclusions about the account's authenticity should be treated as tentative pending further evidence.

Data Collection Limitations

- Analysis is based only on data successfully retrieved during this investigation.
- Tweet availability can be affected by X request limits and scraper account availability.
- The requested tweet count is configurable and the report identifies the actual retrieved sample.
- Mention analysis is not a complete social-network graph.
- The retrieved tweet sample does not represent the account's complete historical activity.
- A Wikipedia source and an X account do not independently prove common ownership.
